Demo

Problem we are attempting to solve

With the currently technology:

Key word: Modernize by taking advantage of smartphones

Location

- Not accurate
- Not easily updated

Shareable personal profile information

- Currently not on any available applications
- No real-time updates other than what the caller reports

NG911 Highlights

- Not only audio, but also video and message.
- Enhance data transfer between users and 911.
- More information support for emergency situation.
- User information security.

Green

Current Status

Next Up

- Implement route track
- Mobile sensors data is saved locally before emergency happens
- Sense car crash
- UI and UX
- Testing cases

Issues/Changes - No
