

PROJECT CHARTER	
Project Name	New Generation 911 (NG911)
Date Produced	April 8, 2022
Project Goals	It is estimated that a NG911 infrastructure is to come to Canada around the year 2024. The project goal is to provide some sort of inspiration for this upcoming infrastructure on ways multimedia connections amongst many other features could work.
Project Objectives	Develop two applications capable of connecting with each other via multimedia methods: <ol style="list-style-type: none"> <li>1. A mobile application for reporting emergencies</li> <li>2. An emergency dispatcher dashboard application for responding to emergencies</li> </ol>
Project Budget	N/A
Project Sponsor/Stakeholders	<ul style="list-style-type: none"> <li>• <i>Project Supervisor</i>, Dr. Yasser Morgan</li> <li>• <i>Project Supervisor</i>, former RCMP officer John Leitch</li> <li>• <i>Project Supervisor</i>, Dr. Tim Maciag</li> <li>• <i>Saskatchewan Emergency Dispatcher</i>, Lori Kolybaba</li> </ul>
Project Manager	Team Bugs (Abdelrahman Rabaa, Li Pan, Renz Rivero)
Overall Project Milestones	
Listed in a document found in the project GitHub repository called Milestone-Based-Schedule	
Overall Project Risks	
<ul style="list-style-type: none"> <li>• Privacy as well as security of information being exchanged and stored in the system</li> </ul>
